## Considering switching to salt?

A lot of people think that they have to purchase a new filter system in order to convert their pool to salt water. That is incorrect. Installing the Hayward AquaRite 900 to your existing equipment is easy! It features an extended life turbo cell, that produces 25% more chlorine over it's lifetime than Hayward's leading AquaRite systems. All you need to do is add salt after installation, then swimmer comfort and water clarity are greatly improved. The AquaRite 900 carries an extended warranty that is not available online, so ask us today how to get started!

## Looking to reduce the amount of chemicals in your pool water?

By adding the Hayward HydroRite UVO3, a combination UV & ozone unit to your existing equipment, you will achieve just that. This advanced water treatment system works in collaboration with chlorine or another sanitizer to drastically reduce the overall chemical usage. It even lessens total chlorine demand by 50%. It's the more natural way to sanitize. It's friendly on your wallet and the environment too! Start enjoying the luxury of truly pristine water.

## Looking to extend your swim season?

Your pool is an investment in quality time spent with your family without ever leaving your backyard. The swim season is short enough; why not get more use out of it? Adding the Hayward Summit XL heat pump to your pool will maintain your set desired temperature more cost effectively than a propane unit. Every Summit XL heater comes with an unprecedented 5 year warranty on parts and a full 2 year warranty on labor for added peace of mind!
